

I have an hour commute to and from work five days a week. My toddler and unborn child and I listen to the inspiring words and comments of John and Sherry Rivers along with the uplifting and positive christian music. I wouldn't have any other station available to listen to that provides an encouraging environment for my family. One way I feel K-Love is an incredible asset to our community is by cutting back on road rage. When you have music and comments that are positive and motivating, encourage patience and selflessness, that effects every attitude including road rage. For those of us who spend a large majority of the day in the car, this is a perfect retreat. I can't imagine having to drive in silence for there being no appropriate programs on the radio for small children and families. I WILL NOT listen to the secular music of any kind with children in the car. If K-Love is taken away, it will leave many families in that same situation.
